## Full stack developer

As a passionate web developer, I have built a strong foundation in HTML, CSS, JavaScript, React, and Node.js. My dedication lies in continuous learning and advancement within a dynamic environment, where I can leverage my skills to make meaningful contributions. I am eagerly seeking an opportunity to apply my expertise, further refine my abilities, and evolve as a professional in this exhilarating field.

## WORK EXPERIENCE

React JS Developer  
Freelance

Mar 2023 – May 2023

- Develop web application based on React and Node.js, for a human resources company.  
<https://www.inghumana.com.ar/>
- Launched a responsive version of the website.
- Contributed to the development of the company's own product.
- Improved my team's efficiency by promoting pair programming and an experimentation mindset.
